

DR. JOSEPH EVIATAR

ANTI-AGING ADVICE Live a balanced life and treat yourself well **ALTERNATIVE OCCUPATION** Architecture and interior design **HOBBIES** Travel and fitness, collecting contemporary art and playing the piano **PLACE YOU GO TO ESCAPE THE OFFICE** The beach **FRAMED PHOTOS ON YOUR DESK** My viszlas **RIGHT NOW I'M READING** Eat, Pray, Love by Elizabeth Gilbert **I START EACH DAY** With five minutes of meditation **I'M NEVER WITHOUT** Hope for the future **I WOULD LOVE TO OWN** Three more hours each day all to myself

THE EYES HAVE IT

Dr. Eviatar's experience and impressive know-how in the cosmetic enhancement of the eyelids and surrounding structures has led to a stream of **SATISFIED PATIENTS** who attribute their more youthful and rested appearances to the talented team at Chelsea Eye & Cosmetic Surgery Associates. "I can see the sparkle in patients' eyes after they undergo cosmetic treatment at my practice. Their improved quality of life makes my job so rewarding." A vision-correction patient himself, Dr. Eviatar is able to relate to his patients' concerns. "The eyes are delicate and require the precision of a **SPECIALIZED EYE PLASTIC SURGEON**, familiar with the anatomy and the surrounding facial structures. We provide a comprehensive approach for **MORE TAILORED RESULTS, LESS INVASIVE TREATMENTS** and **MORE INDIVIDUALIZED OUTCOMES.**" Dr. Eviatar believes achieving a natural look is essential. "When patients feel good about themselves, it shows in their eyes and their faces. My goal is to help restore a youthful look and renew confidence using a host of **YOUTH-ENHANCING COSMETIC SURGICAL** and **NONSURGICAL PROCEDURES.** My techniques allow for minimal downtime and the greatest possible safety for our patients."

INSIDE INFORMATION

results you can see

Dr. Joseph Eviatar is skilled in delicate eye procedures and familiar with the surrounding facial structures. "Because my training is so specialized, I am able to concentrate on aesthetic-enhancing procedures directly related to ophthalmic plastic surgery, staying on the forefront of my field," says Dr. Eviatar, who has performed thousands of blepharoplasties and browlifts, among other procedures.

"While I enjoy performing LASIK treatments and reconstructive procedures around the eyes, I find the cosmetic portion of my practice the most rewarding; it gives me the opportunity to enhance the lives of patients, relying on my honed skills as an eye-area specialist." Dr. Eviatar has been chosen to be a lead investigator in FDA clinical trials, most recently for a glue to lift the eyebrows. He is a physician trainer and consultant for Botox® and is often featured in the press. He works with a talented team, including ophthalmologist Christopher T. Coad, MD, FACS (pictured right), who specializes in anterior segment and cataract surgery with advanced intraocular lenses and LASIK.

Fellowship trained in oculoplastic surgery, Dr. Eviatar enjoys working with Dr. Coad, as it provides him the opportunity to narrow his focus on treatments relating to his true passion: aesthetic enhancement of the eyes and the surrounding eye region. "Once patients correct their eyesight, it's natural to consider eyelid rejuvenation or a browlift. People are pleased to discover they can have their procedures performed in one place by physicians with whom they have warm relationships." As co-director of oculoplastic surgery at St. Vincent's Hospital and Medical Center, as well as director of oculoplastics at SUNY College of Optometry, Dr. Eviatar's dedication to education is self-evident. In addition to cosmetic surgeries, Dr. Eviatar is skilled in facial rejuvenation with advanced fillers. "Our philosophy is to be less invasive and produce genuine results," says the lecturer, researcher and physician.

BOARD CERTIFICATION

American Board of Ophthalmology
American Society of Ophthalmic Plastic and Reconstructive Surgery

MEDICAL DEGREE

New York University School of Medicine
