

## DR. JOSEPH EVIATAR

**ANTI-AGING ADVICE** Live a balanced life and treat yourself well **ALTERNATIVE OCCUPATION** Architecture and interior design **HOBBIES** Travel and fitness, collecting contemporary art and playing the piano **PLACE YOU GO TO ESCAPE THE OFFICE** The beach **FRAMED PHOTOS ON YOUR DESK** My viszlas and family **RIGHT NOW I'M READING** Outliers, by Malcolm Gladwell **I START EACH DAY** With five minutes of meditation **I'M NEVER WITHOUT** Hope for the future **I WOULD LOVE TO OWN** Three more hours each day all to myself

## YOUTHFUL YET NATURAL

Dr. Eviatar's experience and impressive know-how in the cosmetic enhancement of the eyelids and surrounding structures has led to a stream of **SATISFIED PATIENTS** who attribute their more youthful appearances to the talented team at Chelsea Eye & Cosmetic Surgery Associates. As a pianist and art collector, he realizes that facial harmony is a critical aspect of beautiful results. A vision-correction and aesthetic patient himself, Dr. Eviatar is able to relate to his patients' concerns. "The eyes are delicate and require the precision of a **SPECIALIZED EYE PLASTIC SURGEON**, familiar with the anatomy and the surrounding facial structures. We provide a comprehensive approach for **MORE TAILORED RESULTS, LESS INVASIVE TREATMENTS** and **MORE INDIVIDUALIZED OUTCOMES.**" Dr. Eviatar believes achieving a natural look is essential. "My goal is to help restore a youthful look and renew confidence using a host of **YOUTH-ENHANCING COSMETIC SURGICAL** and **NONSURGICAL PROCEDURES.** My techniques allow for minimal downtime and the greatest possible safety for our patients." Because of his advanced training and skills, Dr. Eviatar has been chosen to conduct research on minimally invasive surgical techniques and injectable facial fillers.

INSIDE INFORMATION

# art and medicine

Dr. Joseph Eviatar is a skilled injector of advanced facial fillers and Botox®, and is often sought out for treatments around the eyes as well as areas of the face. "Because my training is so specialized, I am able to concentrate on aesthetic-enhancing procedures directly related to ophthalmic plastic surgery, staying at the forefront of my field," says Dr. Eviatar, who has performed thousands of blepharoplasties and browlifts, among other procedures.

"While I enjoy performing reconstructive procedures around the eyes, I find the cosmetic portion of my practice the most rewarding; it gives me the opportunity to enhance the lives of patients, relying on my honed skills as an eye-area specialist." Dr. Eviatar boasts a worldwide patient following as a skilled injector of facial fillers and Botox; and is a physician trainer and consultant for Botox, Juvéderm®, Radiesse®, Sculptra® and Restylane®. He also offers Dysport™ and Relaxed Expressions™ as alternatives to Botox. He is often featured in the press, working with a talented team—including ophthalmologist Christopher T. Coad, MD, FACS (pictured right), who specializes in LASIK and cataract surgery with advanced intraocular lenses. They are currently compiling data for an abstract to be presented at the next annual American Academy of Ophthalmology meeting, to prove the efficacy and safety of LASIK surgery in patients with HIV. Fellowship trained in oculoplastic surgery, Dr. Eviatar enjoys working with his aesthetic team (which also includes a well-credentialed aesthetician and plastic surgeon). Dr. Eviatar is also a participating physician in a pilot study for Relaxed Expressions (to reduce frown lines). He was recently featured on CBS performing the procedure, and administering Radiesse injections via a technique that helps decrease post-treatment bruising. An investigator in FDA studies for Sculptra, as well as BioGlue® for brow lifting surgery, Dr. Eviatar is a clinical instructor at New York Medical College, as well as director of oculoplastics at SUNY College of Optometry—his dedication to education is self-evident. "Our philosophy is to be less invasive and produce long-lasting, natural results," says the lecturer, researcher and physician.
